Skills

- I have built different kinds of web applications with Python and Django for 4+ years.
- Architected scalable systems for some of them with DevOps tools such as Terraform and AWS.
- Recently, I dabbled with my ML projects utilizing Pytorch and fastai.

Education

Bachelor of Technology in Computer Science Engineering from PDPM Indian Institute of Information Technology, Design and Manufacturing, Jabalpur - 2014

Experience

LEAD SOFTWARE ENGINEER | THE VETTED | JAN 2018 – PRESENT

- Currently leading efforts in building the AI team and ML pipeline for Certa platform
- Built the vendor management platform currently serving many Fortune 500 and S&P 100 companies
- Played a key role in building USP features currently in production

SOFTWARE ENGINEER | INSTAWORK | AUG 2017 – NOV 2017

- Worked on the email relay system and growth platform

SOFTWARE DEVELOPER | CHUMBAK | DEC 2014 – JUL 2017

- Built a core e-commerce platform used by thousands of people daily at chumbak.com using Python and Django over the legacy system in Magento
- Managed the Infra on AWS and scaled the traffic to 10x during sale offerings
- Being the first engineer, was pivotal in building recommendations, search, checkout, combined which improved sales by 50%, and increased click ratios over 30%.
- Automated inventory management and increased employee productivity by 120%

SOFTWARE ENGINEER INTERN | WISECELLS | MAY 2013 – NOV 2013

- Developed business strategy simulation from scratch which was used by S&P BSE 500 clients.

Miscellaneous

- International Fastai fellow and contributor to fastai.
- Love MOOCs - finished many Coursera specializations like Deep Learning, Algorithms and courses such as Machine Learning and Financial Markets.
